

My husband and I have had XM-Radio for almost 2 years now. We pay for this service and hope that nothing will take it away or limit thier line-up. We are truck drivers and it is really an essntial part of our day. How can this be any different than Cable TV? Please do not limit satillite radio. Although we have not used the traffic and weather everyday, we have used it in extreme weather or traffic situations.

Again we pay for this service and feel they should not be limited because of local channel worries. Our local tv channels do not seem to be affected by cable tv.
